

## **BERNSTEIN Customer Count** One for all — All in One

The only thing that counts is the health of us all — and the SMART customer count

# Simply smarter customer counting

## Flexible and mobile. Individual and specially for you

The only thing that counts ...  
The **SMART** customer count

Customer counting made easy! Proven industrial technology offers numerous application possibilities and hygienic safety – for you and your customers.

In wholesale and retail trade, customers who are in a store/ shop are often counted with the help of shopping trolleys or baskets. At this point, BERNSTEIN offers a far more convenient and elegant variant of customer counting.

**This free-standing total solution as a combination of hygiene station and smart customer counting fulfils the requirements of the Corona Protection Ordinance twice over.**

The design-oriented and individually configured hygiene column comes to you fully assembled – including software, disinfectant dispenser and monitor.

Would you like parts of the column or the monitor design to match your corporate design? As well as the display of your logo or special information? With pleasure! Simply tell us your individual wishes when you order.

### Real advantages with real benefits For you and your customers

- **Double protection:** Combination of smart customer counting and mobile disinfection column for double protection and hygienic comfort
- **Reduce costs:** The system of “counting by shopping trolley” and its monitoring by security personnel is no longer necessary
- **Save space and provide comfort:** Unnecessary “overcrowding” of the sales area due to shopping trolleys that are not needed is avoided
- **Prevent queues:** According to the Corona Protection Ordinance (§11), crowds at entrances/interfaces of customer traffic are to be avoided, this counting system visualises and makes the factual situation more transparent

**Permitted upper limit NOT reached**

— Passage permitted

**Permitted upper limit reached**

— Passage forbidden

- Signal lamp lights up in red
- Warning notice is displayed

**Touch-free dispenser**  
for fast and effective disinfection

### PRODUCT FEATURES

#### Individual design – Especially for you

- Visual design individually and flexibly adaptable
- Colouring of the column, display of logos as well as visual monitor design according to customer requirements

#### Simple and fast commissioning – Plug and Play

- Simple assembly and quick configuration: set up, plug in, attach the reflective surfaces – Done!!
- No additional wiring, only power connection required (230V)

#### Easy configuration – Via USB stick

- Use the software supplied to conveniently set or change the current maximum number of customers on the PC/laptop and transfer it via USB stick – Ready to go.

#### Effective health protection – Really SMART

- Monitoring of the input and output via integrated light barriers on both sides simultaneously
- Placed centrally in the entrance area – Detecting the entry and exit of every single person (on both sides)
- Recording and visualisation of the current number of customers on the monitor – further visualisations possible
- Signal lamp lights up when maximum number is reached
- Warning notice via monitor (mountable in portrait and landscape format)
