

BERNSTEIN hygiene columns One for all — All in one

Individual solutions for your personal hygiene concept

One concept – Countless solutions

Universal. Individual. Special.

THE FLEXIBLE TOTAL PACKAGE

Proven industrial technology meets rational hygiene management. THE RESULT – Numerous individual application possibilities and extensive hygienic comfort for employees and customers in all areas. **BERNSTEIN hygiene technology offers everything in one.**

From the functional basic version ...
Which offers real hygienic comfort

With BERNSTEIN hygiene solutions, you can optimise your personal hygiene concept economically and flexibly. Thanks to the free-standing mobile hygiene station, you can position your disinfectant dispenser so that it can be conveniently used by visitors, customers and employees. It provides the opportunity for effective hand hygiene almost anywhere. Especially where wall mounting is not possible.

Or is that exactly what you want? Fixed attachment to the wall is also possible – with our wall bracket as an fixed part of your hygiene concept.

Design-oriented as well as high-quality selected components make our hygiene station an absolutely elegant and at the same time durable combination variant that combines several features in one. Completely according to your wishes and requirements.

One column – Countless possibilities.

SIMPLY SMARTER CUSTOMER COUNTING

Choose your personal column variant from our universal design portfolio – from purist standard to complex total solution:

- **The simple basic version** of an elegant aluminium column with memo board and dispenser
- **The barrier-free 2in1 version** with two dispensers at different heights
- **The multifunctional version** equipped with a waste bin and paper towel dispenser
- **The smart, free-standing customer count**, simultaneously with disinfectant dispenser

One column with numerous possibilities that puts the most diverse wishes into practice. A hygiene total package from BERNSTEIN.

Touchless via motion sensor
or operate manually with the hand lever

... up to the SMART complete solution
Specially designed according to your wishes

THE COMPLETE TOTAL PACKAGE

Your hygiene station comes to you fully assembled, including all desired components, and ready for use. Would you like parts of the column in your colour as well as the application of your logos? Gladly! Simply state this when ordering and tell us your desired RAL colour .

From hand disinfection to customer counting

Simple. Fast. Hygienic. Safe.

Courage for colour – No problem.
Just tell us your desired RAL colour for memoboard/paper dispenser and stand (plus surcharge)

The only thing that counts is ...
The SMART customer count
... and – above all – the health of us all.

 **BERNSTEIN**

Customised visualisation design
of the screen display

To protect those even better in the future, the smart hygiene column – as a combination of customer counting and disinfection column – ensures that only a predetermined number of people are present in certain rooms, and that they can disinfect their hands „in passing“.

In many places, wholesalers and retailers measure the number of customers by the quantity of shopping trolleys/baskets. Here, BERNSTEIN offers a far more convenient and elegant variant of customer counting.

- Integrated light barriers detect exit and entry of each individual person (reflector-based)
- Current number of customers is visualised on the monitor

 **Permitted upper limit NOT reached** — Passage permitted

 **Permitted upper limit reached** — Passage prohibited

- Signal lamp lights up red
- Warning appears on the monitor

Monitor as digital information medium

- Reference to mask obligation, distance and disinfection rules
- Design individually and flexibly adaptable

We can implement your own personal hygiene solution specifically for your spatial conditions and according to your wishes – Please contact us.

Light barriers record the number of entry/exit and transmit them to the system
